

Please do not weaken our telephone privacy law. We work third shift. Since signing up on the AG's list we have been sleeping much better. We feel and work better. We are sure it has improved our health. We have adult children and other relatives in many states. We should not have to turn off our phone to sleep and chance missing an emergency call we needed to receive. This phone belongs to us and we would rather see the no-call law strengthened (more restrictive) than weakened. Thank you.
